- Adaptive LED headlights with low-beam and high-beam headlights include LED turn indicators, BMW Selective Beam and Adaptive Headlights.
- The light generated by the LED fog lights is very similar to daylight and enables the driver to see better and drive more safely in inclement weather.
- Telephony with wireless charging offers a comprehensive telephony package with Bluetooth connectivity and the technical capacity for a WiFi hotspot.
- The equipment includes a built-in WiFi hotspot using the LTE standard, which allows for a paid Internet connection.
- The full-colour BMW Head-Up Display projects all relevant driving information onto a panel in the driver’s field of vision, which means they can remain focused on the road. Current speed, directions from the navigation system, Speed Limit Info incl. no-overtaking indicator and telephone and entertainment lists, among other things are displayed.
- The Through-loading system with rear seat backrests that can be folded down in a 40:20:40 split, guarantees flexibility when transporting bulky objects.

When a suitable space has been found, the Parking Assistant takes over steering, while you are responsible for selecting the correct gear, as well as pressing the accelerator and brake.
- The information in the BMW Head-Up Display is not fully visible when viewed through polarised sunglasses. Content shown will depend on the equipment options chosen. Further optional equipment is required to display specific items.
- In selected European countries, the system automatically updates maps for three years up to four times per year without incurring licensing fees.
